Hi Michelle,

The site is a formal state cleanup conducted under the Model Toxics Control Act and was never listed on the NPL. I do not believe a Notification of PCB Activity form was ever submitted to EPA. If you would like to discuss further, I have availability today (after 2 PM) and any time on Monday.

Thank you,

Jeremy

Jeremy Schmidt, P.E.
Site Manager
Toxics Cleanup Program

Hi Jeremy-

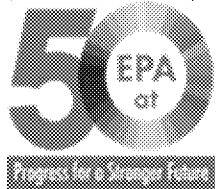

I would like to touch base with you about the Kaiser Aluminum site in Spokane. I saw some recent news about different treatment technologies being implemented for the groundwater.

I was curious, what is the regulatory authority being used for this cleanup? Is CERCLA invoked in any way, possibly as a state-lead CERCLA clean-up?

I was also curious if the site ever submitted a Notification of PCB Activity form to EPA HQ identifying the R&D activity?

Thank you,
